

# LIFT MORE. LIFT HIGHER.

Our 2.5 to 3.5t electric range is BRC compliant and allows you to stack more - at greater heights - than a diesel powered equivalent.

Optimise your operations and improve sustainability when harvesting, preparing, packing and delivering your produce.

And, when seasonal demands require more intensive work, our flexible battery options have you covered.

**So, if you need the right truck and support to boost your business...**  
*We can handle it.*
