

myCOOLMAN

by **MILENCO**

The pioneer of mobile cooling

Theodor and Peter Wähning founded WAECO* in 1974 and developed one of the world's leading companies in Mobile Refrigeration.

11 years after selling to Domestic in 2007, Theodor and his former colleagues from WAECO* realised that new technologies were now available, so they formed myCOOLMAN to bring the latest technology to the market.

These advancements in compressor and thermal efficiency, enabled myCOOLMAN to lead the toughest market for mobile cooling, Australia.

myCOOLMAN has expanded its success to the UK and is now available through Milenco.

Engineered in Germany - Built for the world
